

# Driving demand for Re-refined Base oils

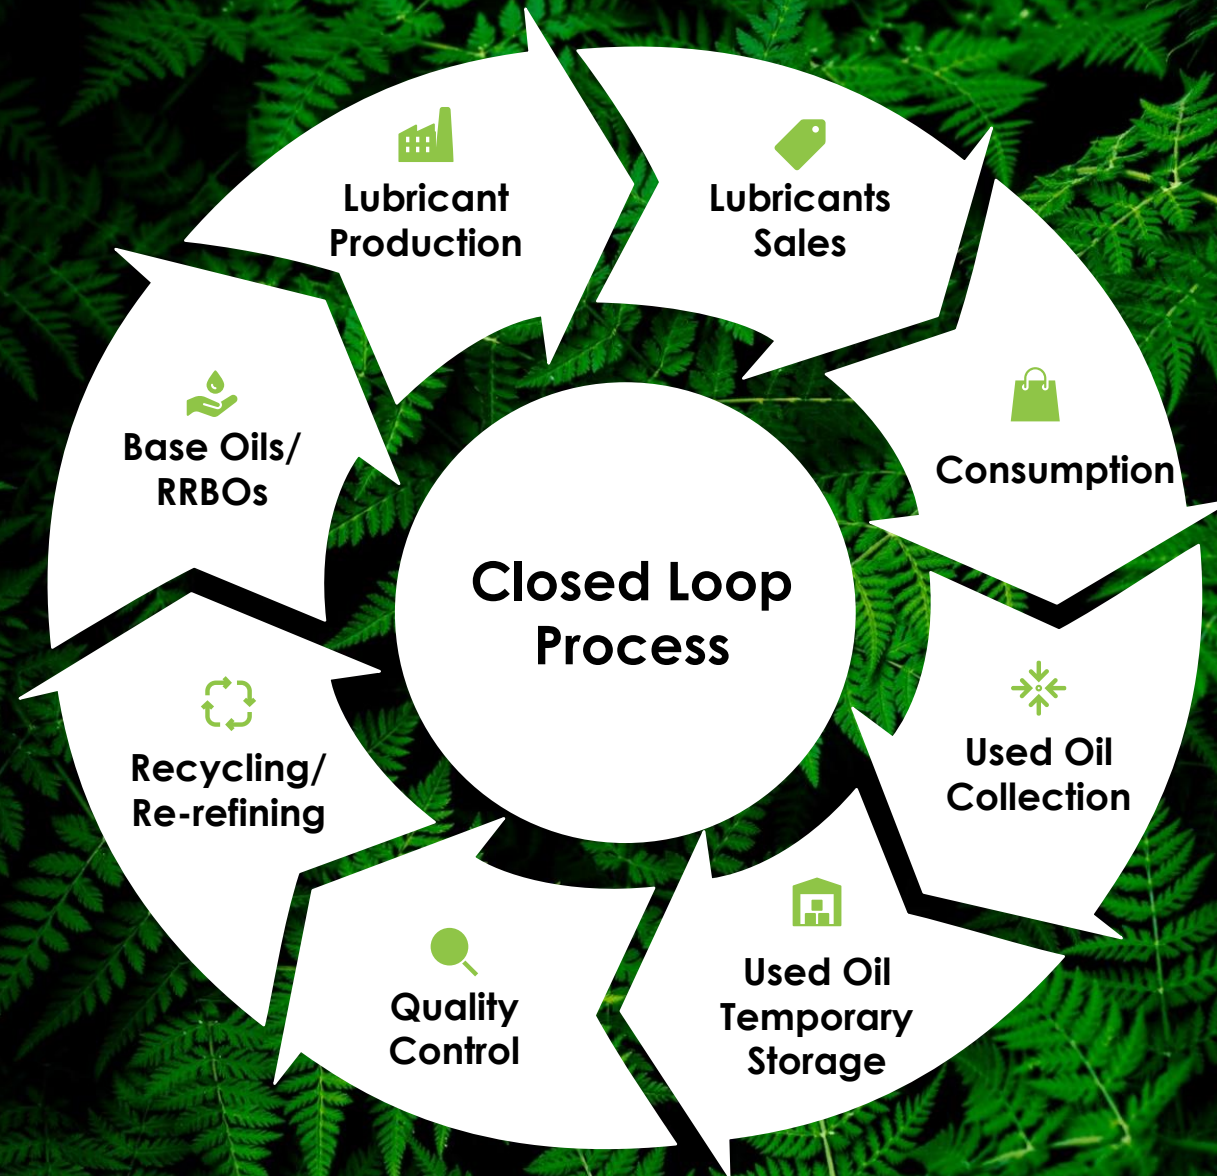

Balancing Performance, Economic and  
Environmental Trade-Offs

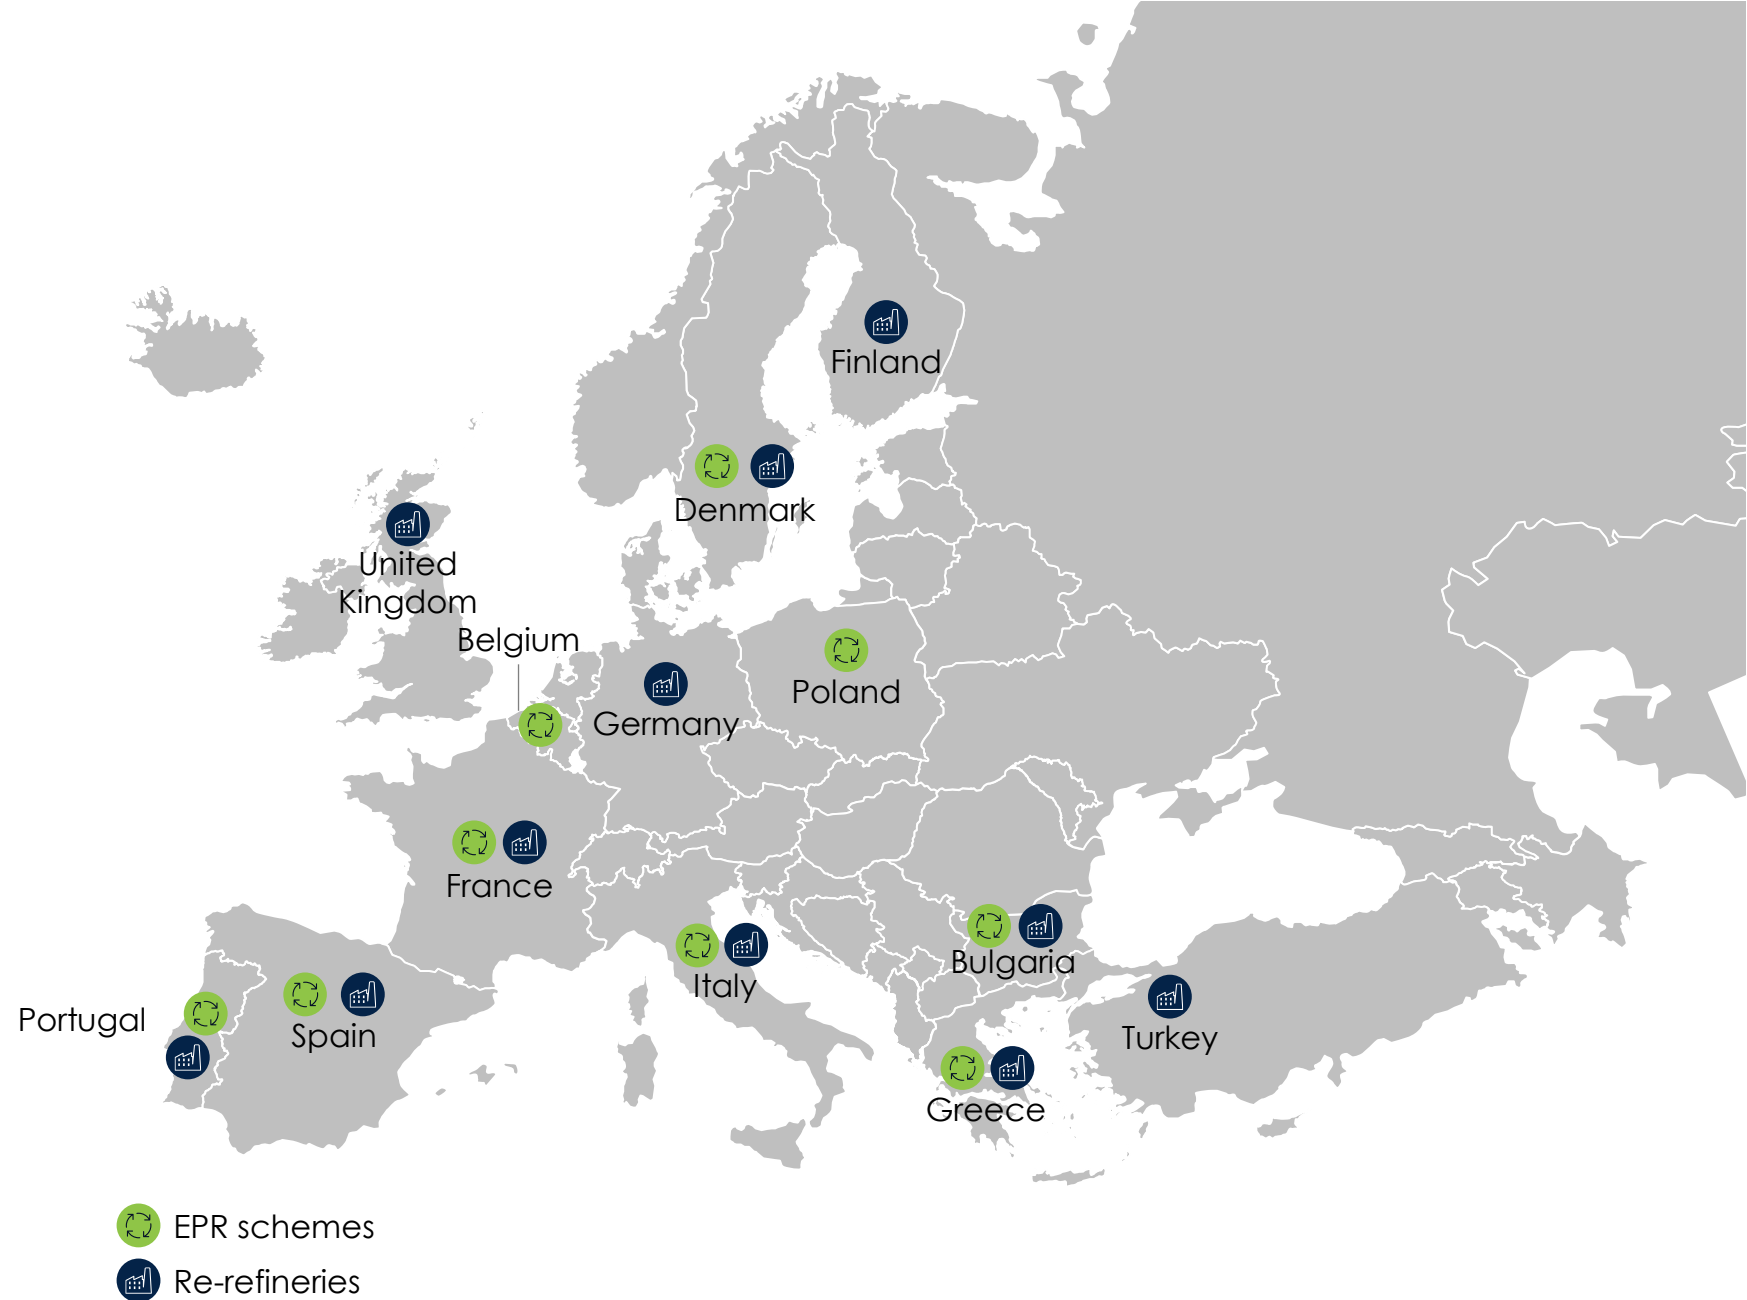

**Miltos Bantis**  
General Manager LPC S.A

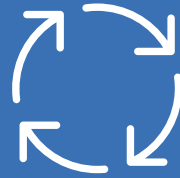

**Used Oil Management plays a crucial role in driving sustainable development goals**

# EPRs & Re-refineries mapping in Europe

# Infrastructure for Re-refining

## EPR Schemes

Effective implementation of EPR schemes engaging all stakeholders to promote the legal collection of used oil and facilitate re-refining

## Collection Network

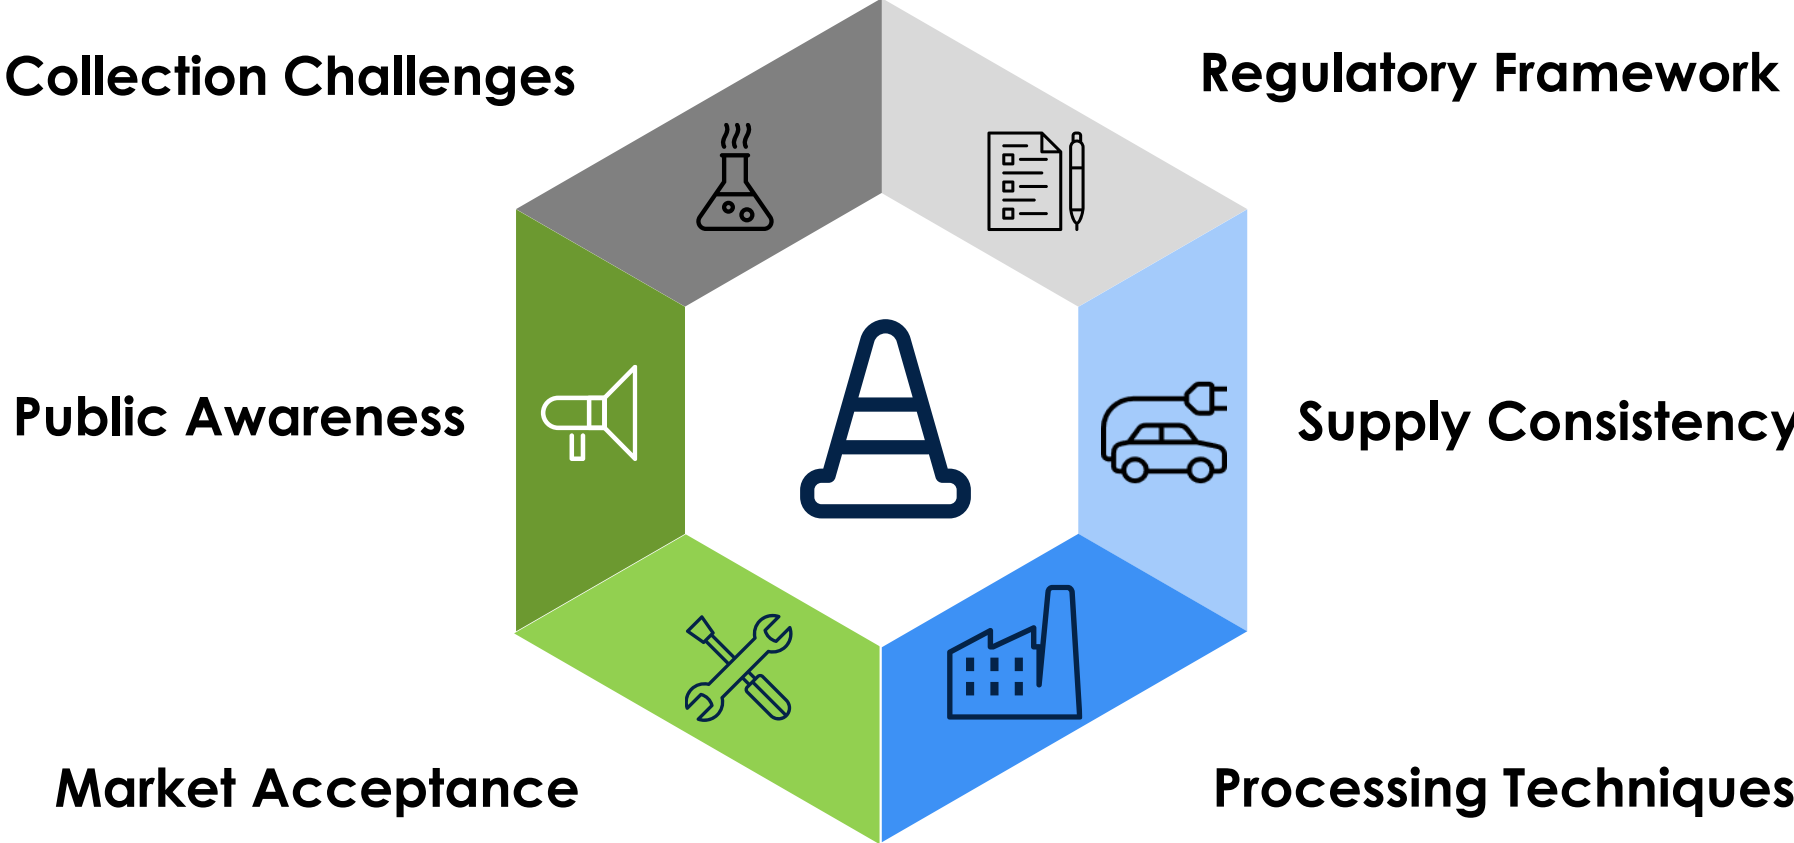

Establishing an efficient network for ensuring a steady supply of feedstock suitable for re-refining

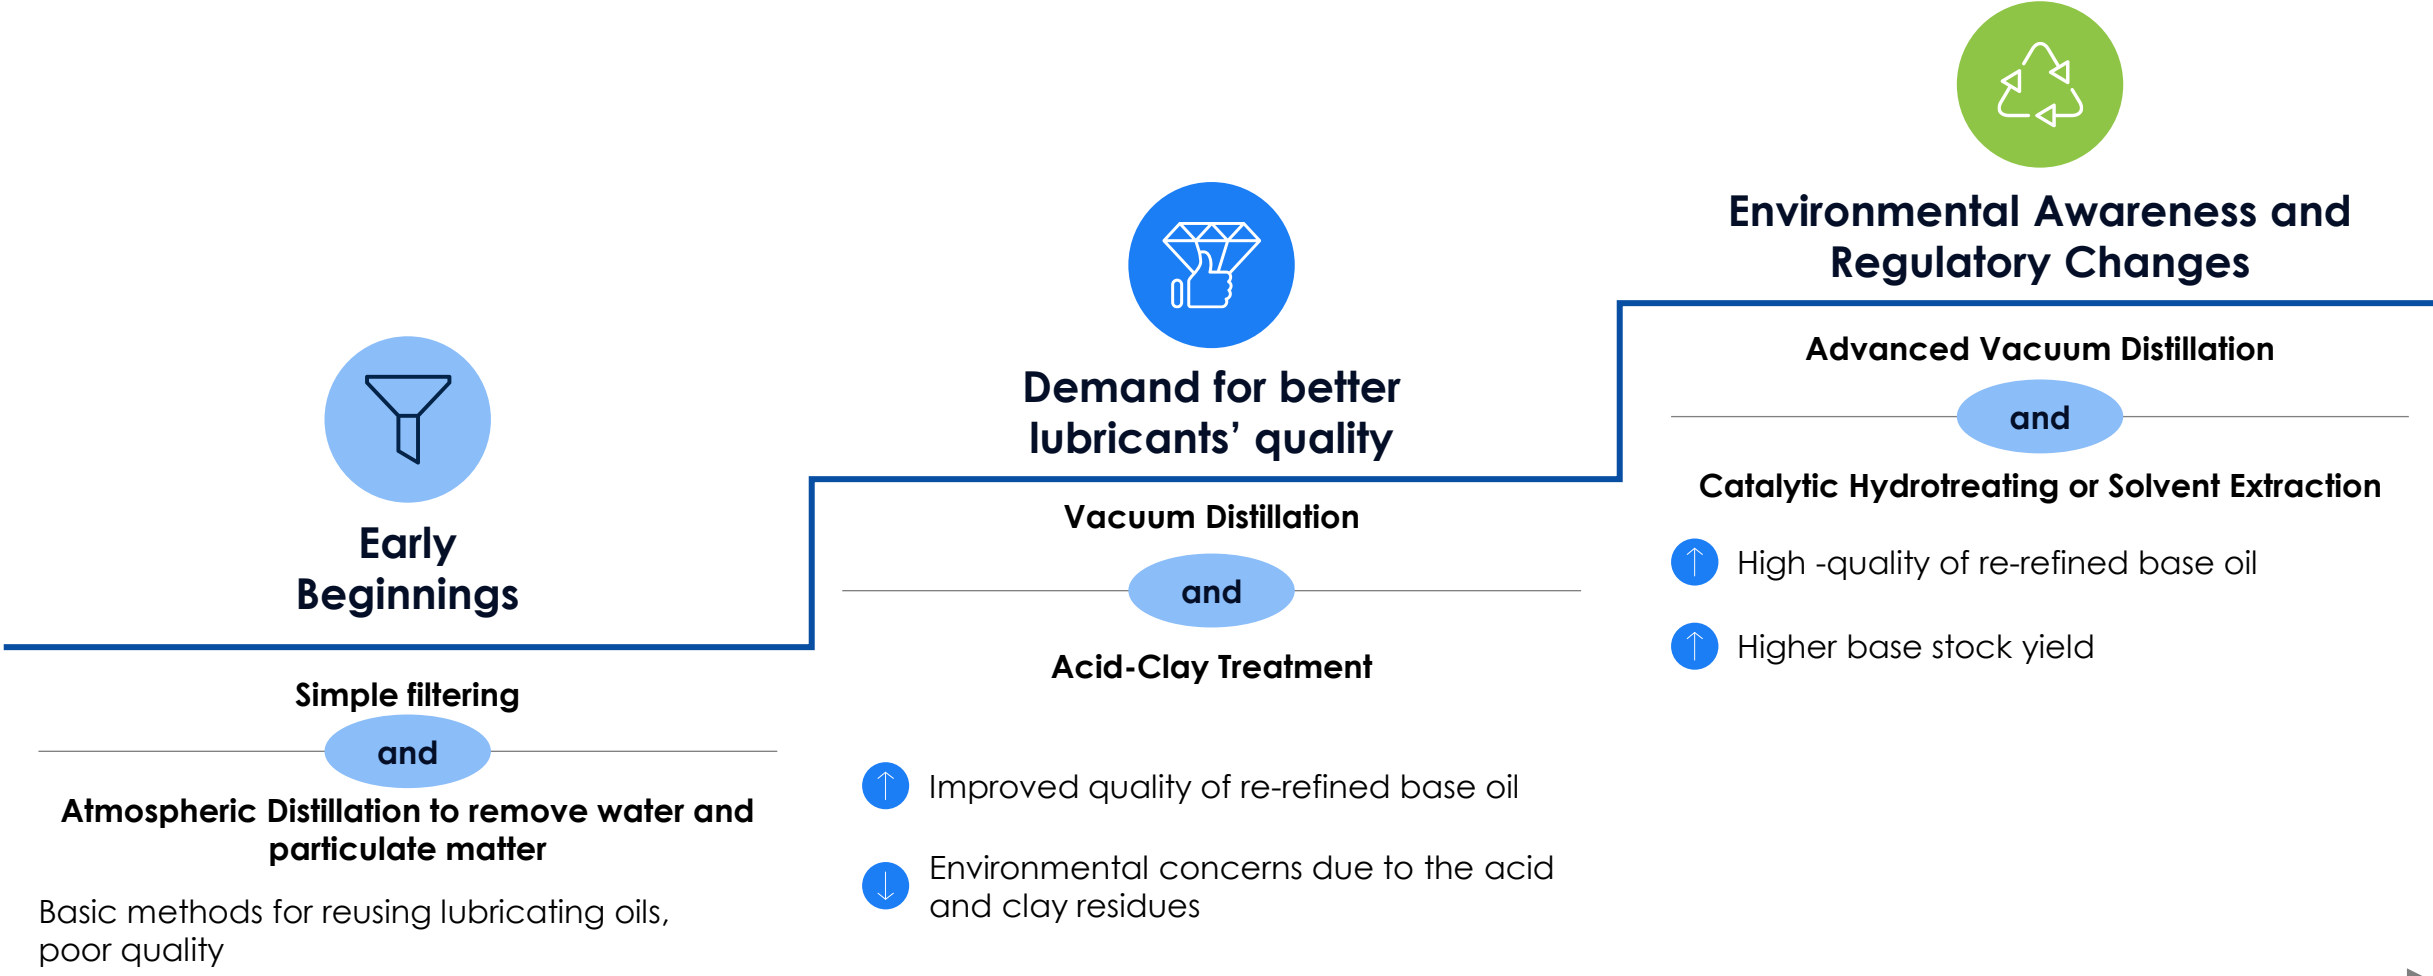

## Re-refining Facilities

State-of-the-art re-refining plants equipped with the latest technology to ensure high-quality output with lower environmental impact

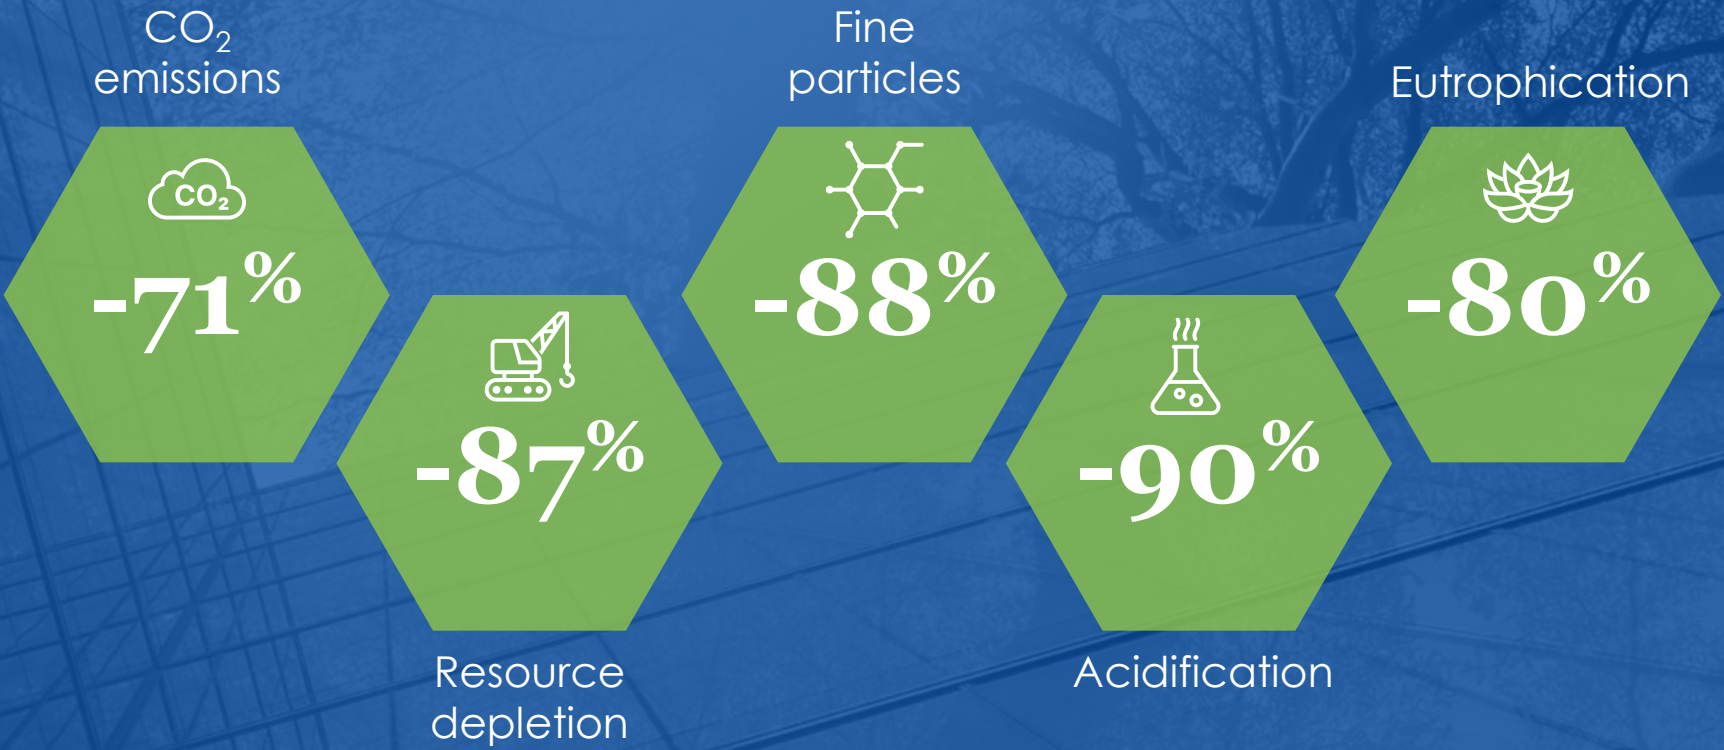

# Identifying Bottlenecks in Re-refining

# Re-refining Technology Development

# Carbon Footprint Comparison

**Re-refined Base Oils prove to be significantly more environmentally friendly compared to Virgin Base Oils**
